

RECOMMENDATION LETTER

Date: 24th of December 2022

It issues me extreme pride to commend Mr. Rajan Malewar to pursue his career further in your precincts. I had known him as the Hardware Design Engineer at Adsys Medtech Pvt Ltd. I have seen him improve his skills exceptionally while under my supervision.

Mr. Rajan joined our firm as a Mechanical Engineering Intern as part of our nine-month Onsite Internship Program during which he has shown to grasp various new concepts at a lightning pace. His projects involved designing and developing our optical systems for our device and even though he had no prior experience in this field he was able research concepts quickly and was able to generate various iterations of the device at a rapid pace. These designs were tested with 3D printing technology at which Mr. Rajan himself participated in generating the slice models. He also had the adaptability to take on other supplementary tasks and complete them with due diligence in an evolving work environment at a startup company. His use of Solidworks for Mechanical Modelling is very proficient, and he is capable of learning changing methodologies in the field with relative ease and apply them to his models appropriately. He is also a great team player providing various ideas and actively participating in meetings during discussion.

Mr. Sonel Florenne Dalmeida
